## List of Contributors

- V.C. ABRAHAMSON – Department of Physiology, Queen's University, Kingston, Ontario K7L 3N6, Canada.
- J.H.J. ALLUM – Institut für Hirnforschung, Universität Zürich, 8029 Zürich, Switzerland.
- J.H. ANDERSON – Laboratory of Neurophysiology, University of Minnesota Medical School, Minneapolis, MN 55455, U.S.A.
- H. ASANUMA – The Rockefeller University, New York, NY 10021, U.S.A.
- G.B. AZZENA – Istituto di Fisiologia Umana, Università di Sassari, 07100 Sassari, Italy.
- R. BAKER – Department of Physiology and Biophysics, New York University Medical Center, New York, NY 10016, U.S.A.
- C. BATINI – Laboratoire de Psychophysologie Sensorielle, Université Pierre et Marie Curie, 75230 Paris, France.
- A. BERTHOZ – Laboratoire de Physiologie du Travail du C.N.R.S., Département de Physiologie Neurosensorielle, 75005 Paris, France.
- E. BIZZI – Department of Psychology, Massachusetts Institute of Technology, Cambridge, MA 02139, U.S.A.
- R.H.I. BLANKS – Max-Planck-Institut für Hirnforschung, Neurobiologische Abteilung, 6000 Frankfurt/M.-Niederrad, F.R.G.
- R. BORTOLAMI – Istituto di Anatomia degli Animali Domestici, Università di Bologna, 40126 Bologna, Italy.
- R.M. BOWKER – Marine Biomedical Institute, Departments of Psychiatry and Behavioral Sciences and Physiology and Biophysics, University of Texas Medical Branch, Galveston, TX 77550, U.S.A.
- P. BUISSERET – Laboratoire de Neurophysiologie, Collège de France, 75231 Paris, France.
- R.E. BURKE – Laboratory of Neural Control, National Institute of Neurological and Communicative Disorders and Stroke, National Institutes of Health, Bethesda, MD 20014, U.S.A.
- H.J. BÜDINGER – Department of Neurology, St. Elisabethan Hospital, Ravensburg, F.R.G.
- U. BÜTTNER – Neurologische Klinik, Universität Zürich, 8091 Zürich, Switzerland.
- J.A. BÜTTNER-ENNEVER – Institut für Hirnforschung, Universität Zürich, 8029 Zürich, Switzerland.
- A.J. CASTIGLIONI – Marine Biomedical Institute, Departments of Psychiatry and Behavioral Sciences and Physiology and Biophysics, University of Texas Medical Branch, Galveston, TX 77550, U.S.A.
- P.D. CHENEY – Department of Physiology and Biophysics, and Regional Primate Research Center, University of Washington, Seattle, WA 98195, U.S.A.
- H. COLLEWIJN – Department of Physiology, Faculty of Medicine, Erasmus University, Rotterdam, The Netherlands.
- N. CORVAJA – Istituto di Fisiologia Umana, Cattedra II, Università di Pisa, 56100 Pisa, Italy.
- J.D. COULTER – Marine Biomedical Institute, Departments of Psychiatry and Behavioral Sciences and Physiology and Biophysics, University of Texas Medical Branch, Galveston, TX 77550, U.S.A.
- J.H. COURION – Laboratoire de Neurophysiologie Expérimentale, I.N.S.E.R.M. Unité 94, 69500 Bron, France.
- M. CROMMELINCK – Laboratoire de Neurophysiologie, Université Catholique de Louvain, 1200 Bruxelles, Belgium.
- C. DARLOT – Laboratoire de Physiologie du Travail du C.N.R.S., Département de Physiologie Neurosensorielle, 75005 Paris, France.
- J. DELGADO-GARCIA – Departamento de Fisiologia, Facultad de Medicina, Sevilla, Spain.
- F. DENOTH – Istituto di Elaborazione dell'Informazione, C.N.R., 56100 Pisa, Italy.
- J. DICHGANS – Neurologische Klinik, Eberhard-Karls-Universität Tübingen, 7400 Tübingen-1, F.R.G.
- N. DIERINGER – Max-Planck-Institut für Hirnforschung, Neurobiologische Abteilung, 6000 Frankfurt/M.-Niederrad, F.R.G.
- M. DOERR – Neurologische Klinik, Abteilung für Neurophysiologie, Universität Freiburg i. Br., 7800 Freiburg i. Br., F.R.G.

- J.R. DUFRESNE – Laboratory of Neurophysiology, University of Minnesota Medical School, Minneapolis, MN 55455, U.S.A.
- C.-F. EKEROT – Institute of Physiology, University of Lund, S-223 62 Lund, Sweden.
- K. EZURE – Department of Physiology, Institute of Brain Research School of Medicine, University of Tokyo, Tokyo, Japan.
- M. FAVILLA – Istituto di Fisiologia Umana, Cattedra II, Università di Pisa, 56100 Pisa, Italy.
- E.E. FETZ – Department of Physiology and Biophysics, and Regional Primate Research Center, University of Washington, Seattle, WA 98195, U.S.A.
- K. FUKUSHIMA – The Rockefeller University, New York, NY 10021, U.S.A.
- Y. GAHERY – C.N.R.S., Institut de Neurophysiologie et Psychophysiologie, Département de Neurophysiologie Générale, 13274 Marseille, France.
- B. GHELARDUCCI – Istituto di Fisiologia Umana, Cattedra II, Università di Pisa, 56100 Pisa, Italy.
- J.M. GOLDBERG – Department of Pharmacological and Physiological Sciences, University of Chicago, Chicago, IL 60637, U.S.A.
- R. GRANIT – Nobel Institute for Neurophysiology, Karolinska Institutet, S-104 01 Stockholm, Sweden.
- S. GRILLNER – Fysiologiska Institutionen III, Karolinska Institutet, S-114 33 Stockholm, Sweden.
- A.F. GROOTENDORST – Department of Physiology, Faculty of Medicine, Erasmus University, Rotterdam, The Netherlands.
- O.-J. GRÜSSER – Physiologisches Institut, Freie Universität Berlin, 1000 Berlin 33, F.R.G.
- A.E. HENDRICKSON – Department of Ophthalmology, University of Washington, Seattle, WA 98195, U.S.A.
- V. HENN – Neurologische Klinik, Universität Zürich, 8091 Zürich, Switzerland.
- K. HEPP – Theoretische Physik, Eidgenössische Technische Hochschule, 8093 Zürich, Switzerland.
- R. HESS – Mass-Planck-Institut für biophysikalische Chemie, Neurobiologische Abteilung, 3400 Göttingen-Nikolausberg, F.R.G.
- S.M. HIGHSTEIN – Department of Neuroscience, Rose F. Kennedy Center, Albert Einstein College of Medicine, Bronx, NY 10461, U.S.A.
- N. HIRAI – Laboratory of Physiology, Institute of Basic Medical Sciences, University of Tsukuba, Niihari-gun, Ibaraki-ken 300-31, Japan.
- S. HOMMA – Department of Physiology, School of Medicine, Chiba University, Chiba, Japan.
- T. HONGO – Laboratory of Physiology, Institute of Basic Medical Sciences, University of Tsukuba, Niihari-gun, Ibaraki-ken 300-31, Japan.
- J. HORCHOLLE – BOSSAVIT, Laboratoire de Physiologie Nerveuse du C.N.R.S., 91190 Gif-sur-Yvette, France.
- M. ITO – Department of Physiology, Faculty of Medicine, University of Tokyo, 7-3-1 Hongo, Bunkyo-ku, Tokyo, Japan.
- E. JANKOWSKA – Department of Physiology, University of Göteborg, S-400 33 Göteborg, Sweden.
- M. JEANNEROD – Laboratoire de Neuropsychologie Expérimentale, I.N.S.E.R.M. Unité 94, 69500 Bron, France.
- R. JUNG – Neurologische Klinik, Abteilung für Neurophysiologie, Universität Freiburg i. Br., 7800 Freiburg i. Br., F.R.G.
- E.L. KELLER – Department of Electrical Engineering and Computer Sciences and Electronics Research Laboratory, University of California, Berkeley, CA 94720, U.S.A.
- J. KIMM – Departments of Otolaryngology and Physiology and Biophysics, University of Washington, Seattle, WA 98195, U.S.A.
- J. KRÖLLER – Physiologisches Institut, Freie Universität Berlin, 1000 Berlin 33, F.R.G.
- M. LACOUR – Laboratoire de Psychophysiologie, Faculté des Sciences, Marseille, France.
- W. LANG – Institut für Hirnforschung, Universität Zürich, 8029 Zürich, Switzerland.
- Y. LAPORTE – Laboratoire de Neurophysiologie, Collège de France, 75231 Paris, France.
- B. LARSON – Institute of Physiology, University of Lund, S-223 62 Lund, Sweden.
- M.McD. LEWIS – Sherrington School of Physiology, St. Thomas's Hospital Medical School, London SE1 7EH, U.K.
- R. LLINÁS – Department of Physiology and Biophysics, New York University Medical Center, New York, NY 10016, U.S.A.
- J. LOPEZ-BARNEO – Laboratoire de Physiologie du Travail du C.N.R.S., Département de Physiologie Neuro-sensorielle, 75005 Paris, France.
- A. LUNDBERG – Department of Physiology, University of Göteborg, S-400 33 Göteborg, Sweden.

- M. MAEDA – Department of Neurosurgery, School of Medicine, Juntendo University, 3-1-3 Hongo, Bunkyo-ku, Tokyo, Japan.
- P.C. MAGHERINI – Istituto di Fisiologia Umana, Cattedra II, Università di Pisa, 56100 Pisa, Italy.
- O. MAMELI – Istituto di Fisiologia Umana, Università di Sassari, 07100 Sassari, Italy.
- E. MANNI – Istituto di Fisiologia Umana, Università Cattolica del Sacro Cuore, 00100 Roma, Italy.
- J. MASSION – Institut de Neurophysiologie et Psychophysiologie, C.N.R.S., Département de Neurophysiologie Générale, 13274 Marseille Cedex 2, France.
- R.A. McCREA – Department of Physiology and Biophysics, New York University Medical Center, New York, NY 10016, U.S.A.
- T. MERGNER – Neurologische Klinik, Universität Ulm, Ulm-Donau, F.R.G.
- M. MEULDERS – Laboratoire de Neurophysiologie, Université Catholique de Louvain, 1200 Bruxelles, Belgium.
- D.L. MEYER – Neurobiology Unit, Department of Psychiatry, University of Göttingen, 3400 Göttingen, F.R.G.
- Y. MIYASHITA – Department of Physiology, Faculty of Medicine, University of Tokyo, 7-3-1 Hongo, Bunkyo-ku, Tokyo, Japan.
- E.A. MURRAY – Marine Biomedical Institute, Departments of Psychiatry and Behavioral Sciences and Physiology and Biophysics, University of Texas Medical Branch, Galveston, TX 77550, U.S.A.
- Y. NAKAJIMA – Department of Physiology, School of Medicine, Chiba University, Chiba, Japan.
- L.M. NASHNER – Neurological Sciences Institute, Good Samaritan Hospital and Medical Center, Portland, OR 97209, U.S.A.
- O. OSCARSSON – Institute of Physiology, University of Lund, S-223 62 Lund, Sweden.
- B.W. PETERSON – The Rockefeller University, New York, NY 10021, U.S.A.
- O. POMPEIANO – Istituto di Fisiologia Umana, Cattedra II, Università di Pisa, 56100 Pisa, Italy.
- W. PRECHT – Max-Planck-Institut für Hirnforschung, Neurobiologische Abteilung, 6000 Frankfurt/M. – Niederrad, F.R.G.
- A. PROCHAZKA – Sherrington School of Physiology, St. Thomas's Hospital Medical School, London SE1 7EH, U.K.
- H. REISINE – Department of Neuroscience, Rose F. Kennedy Center, Albert Einstein College of Medicine, Bronx, NY 10461, U.S.A.
- F.J.R. RICHMOND – Department of Physiology, Queen's University, Kingston, Ontario K7L 3N6, Canada.
- T.D.M. ROBERTS – Institute of Physiology, University of Glasgow, Glasgow G12 8QQ, Scotland, U.K.
- P.K. ROSE – Department of Physiology, Queen's University, Kingston, Ontario K7L 3N6, Canada.
- A. ROUCOUX – Laboratoire de Neurophysiologie, Université Catholique de Louvain, 1200 Bruxelles, Belgium.
- S. SASAKI – Laboratory of Physiology, Institute of Basic Medical Sciences, University of Tsukuba, Niihari-gun, Ibaraki-ken 300-31, Japan.
- Th. SAVIDES – Neurologische Klinik, Abteilung für Neurophysiologie, Universität Freiburg i.Br., 7800 Freiburg i.Br., F.R.G.
- K.-P. SCHAEFER – Neurobiology Unit, Department of Psychiatry, University of Göttingen, 3400 Göttingen, F.R.G.

- H. ZIERAU – Neurobiology Unit, Department of Psychiatry, University of Göttingen, 3400 Göttingen, F.R.G.

# Contents

Preface .....	v
List of Contributors .....	vii
Opening Lecture – Some comments on “tone”; R. Granit (Stockholm, Sweden) .....	xvii

## SECTION I – PROPRIOCEPTIVE INFLUENCES FROM LIMB RECEPTORS

### A – Proprioceptive Control on Spinal Motoneurons

1. On the intrafusal distribution of dynamic and static fusimotor axons in cat muscle spindles, Y. Laporte (Paris, France) .....	3
2. Multisensory control of spinal reflex pathways, A. Lundberg (Göteborg, Sweden) .....	11
3. New observations on neuronal organization of reflexes from tendon organ afferents and their relation to reflexes evoked from muscle spindle afferents, E. Jankowska (Göteborg, Sweden) .	29
4. Input-output relationship in spinal motoneurons in the stretch reflex, S. Homma and Y. Nakajima (Chiba, Japan) .....	37
5. Contribution of different size motoneurons to Renshaw cell discharge during stretch and vibration reflexes, P. Wand and O. Pompeiano (Pisa, Italy) .....	45
6. The role of synaptic organization in the control of motor unit activity during movement, R.E. Burke (Bethesda, MD, U.S.A.) .....	61
7. Adaptive properties of the myotatic feedback, C.A. Terzuolo, J.F. Soechting and J.R. Dufresne (Minneapolis, MN, U.S.A.) .....	69

### B – Proprioceptive Control of Supraspinal Structures and Supraspinal Influences on the Spinal Cord

1. Information carried by the spinocerebellar paths, C.-F. Ekerot, B. Larson and O. Oscarsson (Lund, Sweden) .....	79
2. Responses of dorsal spinocerebellar tract neurons to signals from muscle spindle afferents, O.-J. Grüsser and J. Kröllner (Berlin, F.R.G.) .....	91
3. Effects of high threshold muscle afferent volleys on ascending pathways, W.D. Willis (Galveston, TX, U.S.A.) .....	105
4. Proprioceptive influences on somatosensory and motor cortex, P. Zarzecki and H. Asanuma (New York, NY, U.S.A.) .....	113

5. Vestibulospinal, reticulospinal and interstitiospinal pathways in the cat, K. Fukushima, B.W. Peterson and V.J. Wilson (New York, NY, U.S.A.) .....	121
6. Muscle fields and response properties of primate corticomotoneuronal cells, E.E. Fetz and P.D. Cheney (Seattle, WA, U.S.A.) .....	137
7. Interpretation of supraspinal effects on the gamma system, R. Granit (Stockholm, Sweden) ....	147
8. Discharge rates of muscle afferents during voluntary movements of different speeds, M.McD. Lewis, A. Prochazka, K.-H. Sontag and P. Wand (London, U.K. and Göttingen, F.R.G.) .....	155
9. Supraspinal control of ascending pathways, W.D. Willis (Galveston, TX, U.S.A.) .....	163

#### **C – Reflex Control of Posture and Movement**

1. Organization and programming of motor activity during posture control, L.M. Nashner (Portland, OR, U.S.A.) .....	177
2. Coupled stretch reflexes in ankle muscles: an evaluation of the contributions of active muscle mechanisms to human posture stability, J.H.J. Allum and H.J. Büdingen (Zürich, Switzerland and Ravensburg, F.R.G.) .....	185
3. The role of vision in the control of posture during linear motion, A. Berthoz, M. Lacour, J.F. Soechting and P.P. Vidal (Paris and Marseille, France) .....	197
4. Direction-specific vestibular and visual modulation of fore- and hindlimb reflexes in cats, U. Thoden, J. Dichgans, M. Doerr and Th. Savides (Freiburg i.Br., F.R.G.) .....	211
5. Diagonal stance in quadrupeds: a postural support for movement, J. Massion and Y. Gahery (Marseille, France) .....	219
6. Interaction between central and peripheral mechanisms in the control of locomotion. S. Grillner (Stockholm, Sweden) .....	227
7. Two functions of reflexes in human movement: interaction with preprograms and gain of force, R. Jung (Freiburg, i.Br., F.R.G.) .....	237

#### **SECTION II – PROPRIOCEPTIVE INFLUENCES FROM NECK RECEPTORS**

1. What are the proprioceptors of the neck? F.J.R. Richmond and V.C. Abrahams (Kingston, Ontario, Canada) .....	245
2. Proprioceptive and somatosensory influences on neck muscle motoneurons, P.K. Rose and N. Sprott (Kingston, Ontario, Canada) .....	255
3. Cortical, tectal and medullary descending pathways to the cervical spinal cord, J.D. Coulter, R.M. Bowker, S.P. Wise, E.A. Murray, A.J. Castiglioni and K.N. Westlund (Galveston, TX, U.S.A.) .....	263
4. Tonic cervical influences on forelimb and hindlimb monosynaptic reflexes, U. Thoden and D. Wenzel (Freiburg i.Br., F.R.G.) .....	281

#### **SECTION III – PROPRIOCEPTIVE INFLUENCES FROM EYE MUSCLE RECEPTORS**

1. Peripheral and central organization of the extraocular muscle proprioception in the unguata, E. Manni and R. Bortolami (Roma and Bologna, Italy) .....	291
2. Properties of the receptors of the extraocular muscles, C. Batini (Paris, France) .....	301

3. Extraocular muscle input to the cerebellar cortex, C. Batini (Paris, France) .....	315
4. Proprioceptive influences from eye muscle receptors on cells of the superior colliculus, V.C. Abrahams (Kingston, Ontario, Canada) .....	325
5. Extraocular muscle afferents and visual input interactions in the superior colliculus of the cat, C. Batini and G. Horcholle-Bossavit (Paris, France) .....	335
6. Does extraocular proprioception influence the development of visual processes and the oculomotor system? P. Buisseret (Paris, France) .....	345

#### SECTION IV – LABYRINTHINE INFLUENCES ON THE MOTOR SYSTEM

##### A – Labyrinthine Receptors and their Influences on the Vestibular Nuclei

1. Vestibular receptors in mammals: afferent discharge characteristics and efferent control; J.M. Goldberg (Chicago, IL, U.S.A.) .....	355
2. Labyrinthine influences on the vestibular nuclei, W. Precht (Frankfurt/M.-Niederrad, F.R.G.) .....	369
3. Response of vestibular and cerebellar neurons to rotational stimulation, J. Kimm and J.A. Winfield (Seattle, WA, U.S.A.) .....	383

##### B – Labyrinthine Influences on Spinal Motoneurons

1. Reactions to overbalancing, T.D.M. Roberts and G. Stenhouse (Glasgow, U.K.) .....	397
2. Semicircular canal and macular influences on neck motoneurons, M. Maeda (Tokyo, Japan) ...	405
3. Role of vestibular inputs in the organization of motor output to forelimb extensors, J.H. Anderson, J.F. Soechting and C.A. Terzuolo (Minneapolis, MN, U.S.A.) .....	413
4. Efferent and afferent responses during falling and landing in cats, M.McD. Lewis, A. Prochazka, K.-H. Sontag and P. Wand (London, U.K. and Göttingen, F.R.G.) .....	423

##### C – Labyrinthine Influences on Oculomotor Neurons

1. Synaptic and functional organization of vestibulo-ocular reflex pathways, S.M. Highstein and H. Reisine (Bronx, NY, U.S.A.) .....	431
2. Labyrinthine influences on motoneurons responsible for vertical eye movements in the rabbit, B. Ghelarducci, M. Favilla and A. Starita (Pisa, Italy) .....	443
3. Vestibulo-ocular reflex pathways of rabbits and their representation in the cerebellar flocculus, M. Yamamoto (Tokyo, Japan) .....	451
4. Canal-otolith convergence on cat ocular motoneurons, W. Precht, J.H. Anderson and R.H.I. Blanks (Frankfurt/M.-Niederrad, F.R.G.) .....	459
5. Vestibular unit activity during nystagmus, H. Shimazu (Tokyo, Japan) .....	469
6. Organization and control of the vestibulo-ocular reflex, R. Schmid and M. Jeannerod (Pavia, Italy and Bron, France) .....	477

##### D – Interaction of Labyrinthine and Proprioceptive Neck Inputs

1. Otoliths and uprightiness, T.D.M. Roberts (Glasgow, U.K.) .....	493
--	-----

2. Neck and macular labyrinthine influences on the cervical spino-reticulocerebellar pathway, O. Pompeiano (Pisa, Italy) .....	501
3. Neck and macular labyrinthine influences on the Purkinje cells of the cerebellar vermis, F. Denoth, P.C. Magherini, O. Pompeiano and M. Stanojević (Pisa, Italy) .....	515
4. The neck and labyrinthine influences on cervical spinocerebellar tract neurones of the central cervical nucleus in the cat, N. Hirai, T. Hongo, S. Sasaki and K. Yoshida (Ibaraki-ken, Japan) ..	529
5. A role of neck afferents on vestibulocollic reflex elicited by dynamic labyrinthine stimulation, K. Ezure, S. Sasaki, Y. Uchino and V.J. Wilson (Ibaraki-ken, Japan) .....	537
6. Neck influences on the vestibulo-ocular reflex arc and the vestibulocerebellum, M. Maeda (Tokyo, Japan) .....	551
7. Vestibular-neck interaction in abducens neurons, U. Thoden and P. Schmidt (Freiburg i.Br., F.R.G.) .....	561
8. Vestibular influences on the cat's cerebral cortex. T. Mergner (Ulm-Donau, G.F.R.) .....	567
9. The vestibulocortical pathway: neurophysiological and anatomical studies in the monkey, U. Büttner and W. Lang (Zürich, Switzerland) .....	581

#### **E – Compensation of Labyrinthine Functions**

1. Somatosensory and cerebellar influences on compensation of labyrinthine lesions, K.-P. Schaefer D.L. Meyer and G. Wilhelms (Göttingen, F.R.G. and San Diego, CA, U.S.A.) .....	591
2. Cerebellar contribution in compensating the vestibular function, G.B. Azzena, O. Mameli and E. Tolu (Sassari, Italy) .....	599
3. Synaptic mechanisms involved in compensation of vestibular function following hemilabyrinthectomy, N. Dieringer and W. Precht (Frankfurt/M.-Niederrad, F.R.G.) .....	607

### **SECTION V – VISUAL INFLUENCES ON THE MOTOR SYSTEM**

#### **A – Reticular Control of Eye Movements**

1. Organization of reticular projections onto oculomotor neurones, J.A. Büttner-Ennever (Zürich, Switzerland) .....	619
2. Organization of reticular projections to the vestibular nuclei in the cat, N. Corvaja, T. Mergner and O. Pompeiano (Pisa, Italy) .....	631
3. Neuronal activity preceding rapid eye movements in the brain stem of the alert monkey, K. Hepp and V. Henn (Zürich, Switzerland) .....	645
4. Afferent and efferent organization of the prepositus hypoglossi nucleus, R.A. McCrea, R. Baker and J. Delgado-Garcia (New York, NY, U.S.A. and Seville, Spain) .....	653
5. Functional role of the prepositus hypoglossi nucleus in the control of gaze, J. Lopez-Barneo, C. Darlot and A. Berthoz (Paris, France) .....	667

**B — Visual Control of Eye Movements Interaction of Visual and Labyrinthine Inputs**

1. Motion information in the vestibular nuclei of alert monkeys: visual and vestibular input vs. optomotor output, W. Waespe and V. Henn (Zürich, Switzerland) ..... 683
2. Interaction of visual and canal inputs on the oculomotor system via the cerebellar flocculus, Y. Miyashita (Tokyo, Japan) ..... 695
3. Visual-vestibular interactions and the role of the flocculus in the vestibulo-ocular reflex, J. Kimm, J.A. Winfield and A.E. Hendrickson (Seattle, WA, U.S.A.) ..... 703
4. The accessory optic system and its relation to the vestibulocerebellum, J.I. Simpson, R.E. Soodak and R. Hess (New York, NY, U.S.A. and Göttingen-Nikolausberg, F.R.G.) ..... 715
5. Colliculoreticular organization in the oculomotor system, E.L. Keller (Berkeley, CA, U.S.A.) ..... 725
6. Labyrinthine and visual inputs to the superior colliculus neurons, M. Maeda, T. Shibazaki and K. Yoshida (Tokyo and Ibaraki-ken, Japan) ..... 735
7. Visual fixation: a collicular reflex? A. Roucoux, M. Crommelinck and M. Meulders (Bruxelles, Belgium) ..... 745

**C — Compensation and Adaptation of Labyrinthine Functions by Visual Input**

1. Adaptive modification of the vestibulo-ocular reflex in rabbits affected by visual inputs and its possible neuronal mechanisms, M. Ito (Tokyo, Japan) ..... 757
2. Modification of central vestibular neuron response by conflicting visual-vestibular stimulation, E.L. Keller and W. Precht (Berkeley, CA, U.S.A. and Frankfurt/M.-Niederrad, F.R.G.) ..... 763
3. Adaptation of optokinetic and vestibulo-ocular reflexes to modified visual input in the rabbit, H. Collewijn and A. F. Grootendorst (Rotterdam, The Netherlands) ..... 771
4. Visual substitution of labyrinthine defects, J.H. Courjon and M. Jeannerod (Bron, France) ..... 783

**SECTION VI — COORDINATION OF EYE-HEAD MOVEMENTS**

1. Strategies of eye-head coordination, E. Bizzi (Cambridge, MA, U.S.A.) ..... 795
  2. Neural activity pattern in different brain stem structures during eye-head movements, K.-P. Schaefer, D.L. Meyer and H. Zierau (Göttingen, F.R.G.) ..... 805
- SUBJECT INDEX ..... 813
